GLADIOLUS SEEDS

FEB 21 1944

E. M. & W. R. PERRINE FARMS
WHITMORE LAKE, MICHIGAN

FOREWORD

Most of these crosses are from very popular varieties and may have your approval. Others are from new Sports and Seedlings that are fine and should prove valuable as parents.

GROWING

To grow successfully, Glad Seed can be planted in frames or open beds after danger of frost has past. The soil should be a good open garden or compost soil that is mellow.

Plant seed by broadcasting or in rows that can be close together and cover seed either with soil or sand $\frac{3}{4}$ in. deep. We use sterilized soil and sand that has been made so by Steam or Larvacide.

Keep partially shaded and on the moist side as long as the seedlings are in good health. You should have bulbs from $\frac{1}{4}$ to $\frac{3}{4}$ in. at the end of the first season. Some of these will flower the next season and we feel sure you will be pleased with the new colors and forms from our seeds. We use the same seed and will plant those that are left.

TERMS OF SALE

PRICES: All Open Pollinated seed are .02c each. Our mixed varieties are from hand pollinated seed for which we lost the tags and these seeds are .02 $\frac{1}{2}$ c each. Named crossed varieties are .05c each.

All **Sport or Seedling** crosses are .07c each. Order only in units of 5 seeds or more of each cross.

All quotations are subject to previous sale
